Lab: File Path and Link Referencing

Objectives

- Demonstrate understanding of how file paths and links are created to reference files (internal and external)
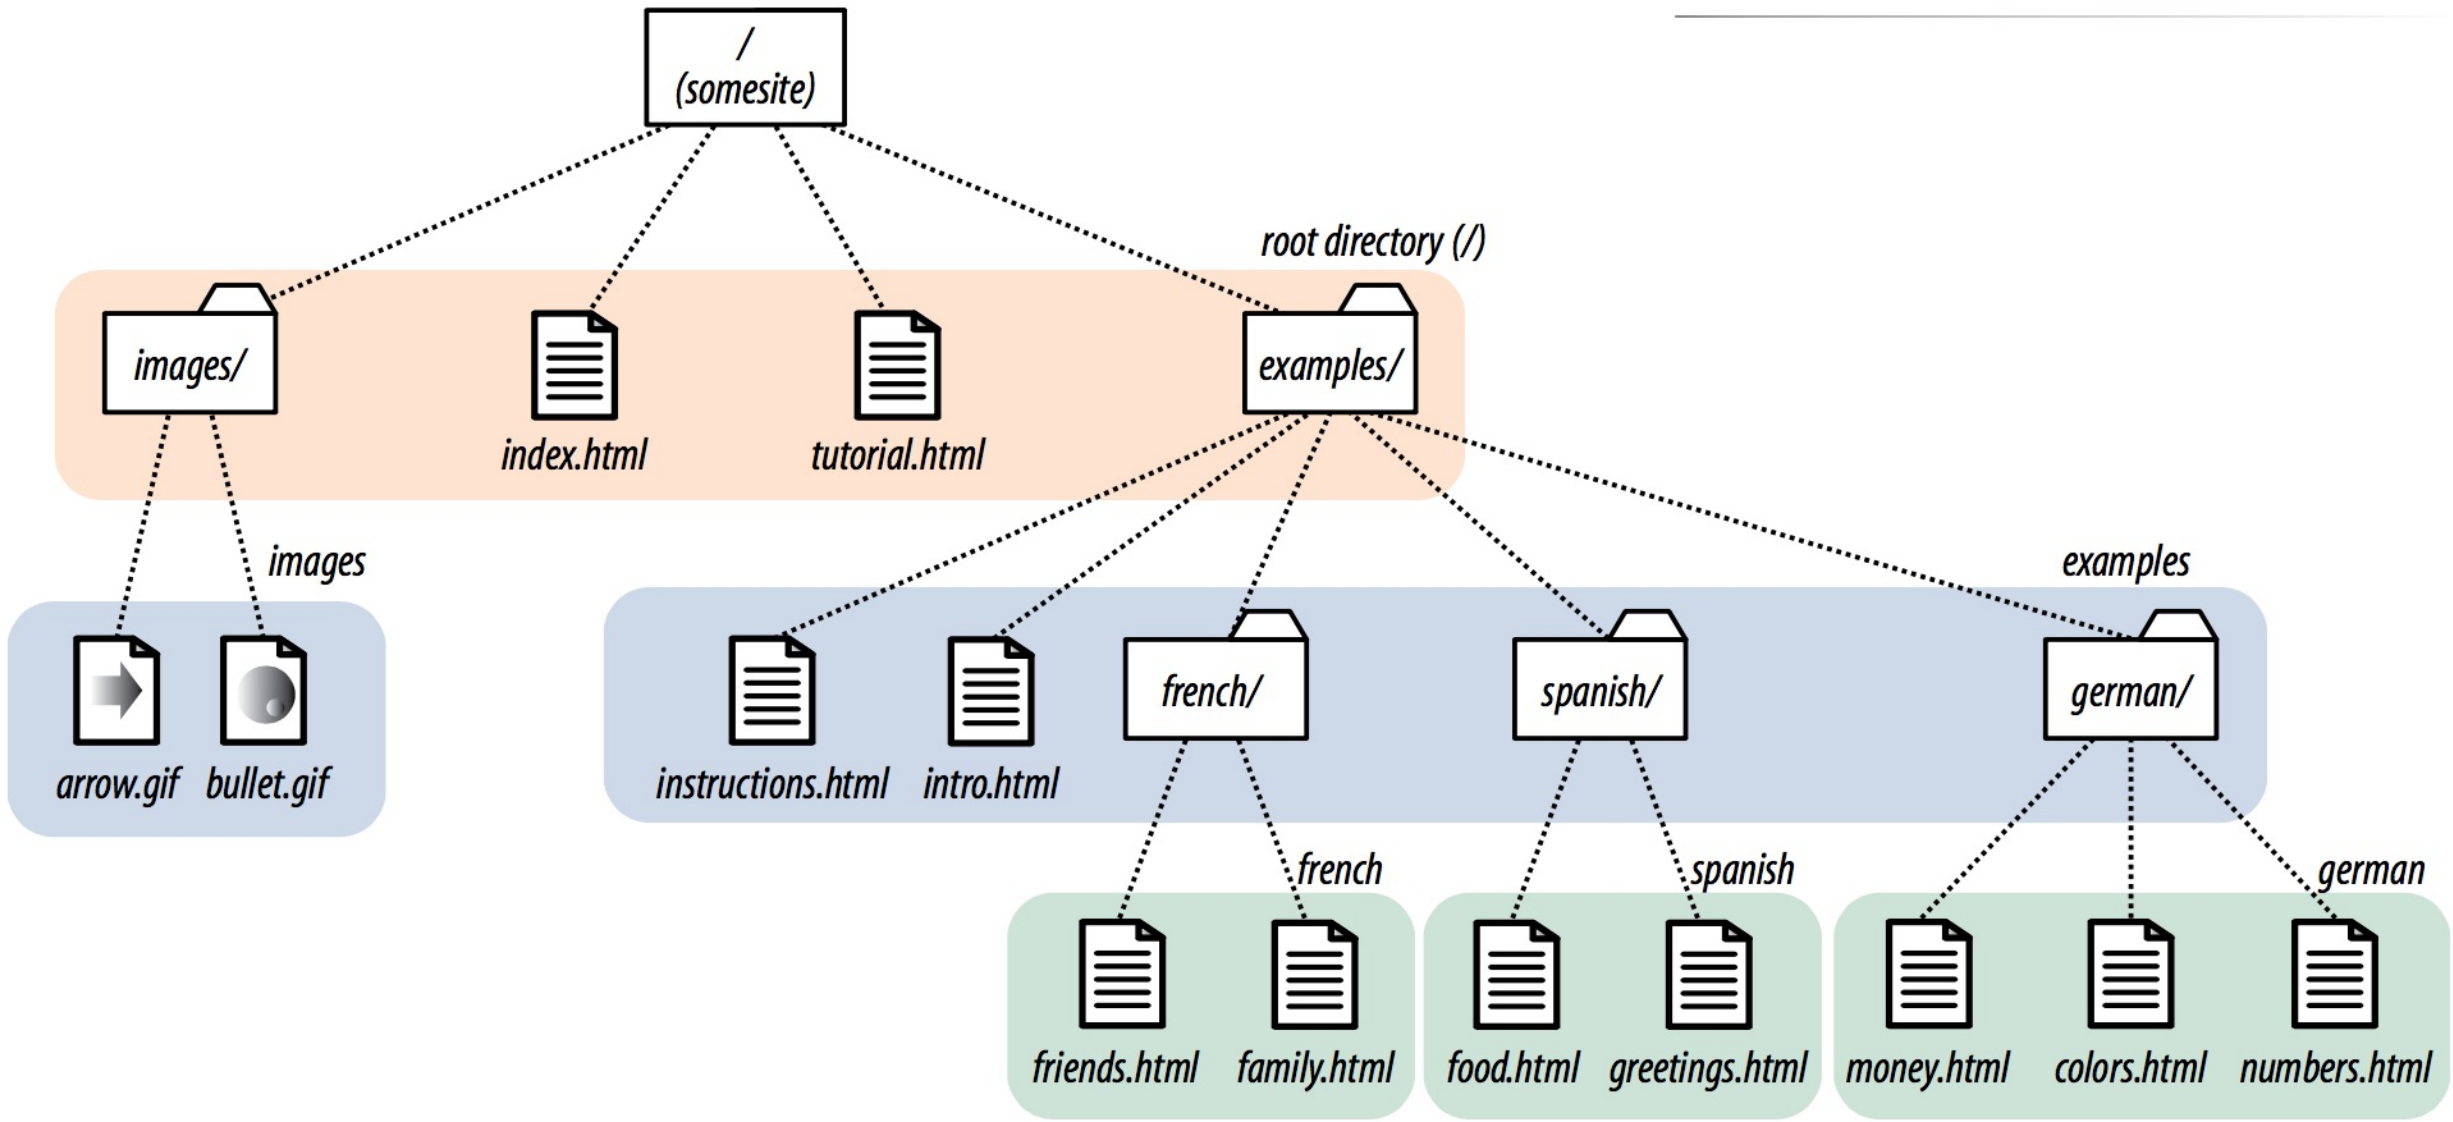

Time to complete: 30 min

Introduction

Using the same directory structure described in Figure 6–12 of our textbook (p. 121), you will create a series of hyperlinks.

Lab Activity

1. Review the following diagram:

2. Create the following:
   A. a link to *money.html* from *index.html*
   B. a link to *tutorial.html* from *friends.html*
   C. a link to *index.html* from *instructions.html*
   D. a link to *arrow.gif* from *greetings.html*
   E. a full hyperlink (anchor element) to the Lone Star website (www.lonestar.edu) that will open a new fresh window.
3. Record your answers in a single document and save as a .pdf document. Upload this to the D2L dropbox.
